

Competitive Intelligence for organizations of all sizes.

About ConsistBIS

In today's fast evolving business environment organizations must quickly adapt to changes through efficient and effective utilization of corporate data bases, business intelligence tools and network architecture

Most organizations identify the web among their most important requirements for integration with their customers, suppliers, distributors and contributors.

ConsistBIS is a family of Business Management solutions which are web-based, modular and customized by market segments .

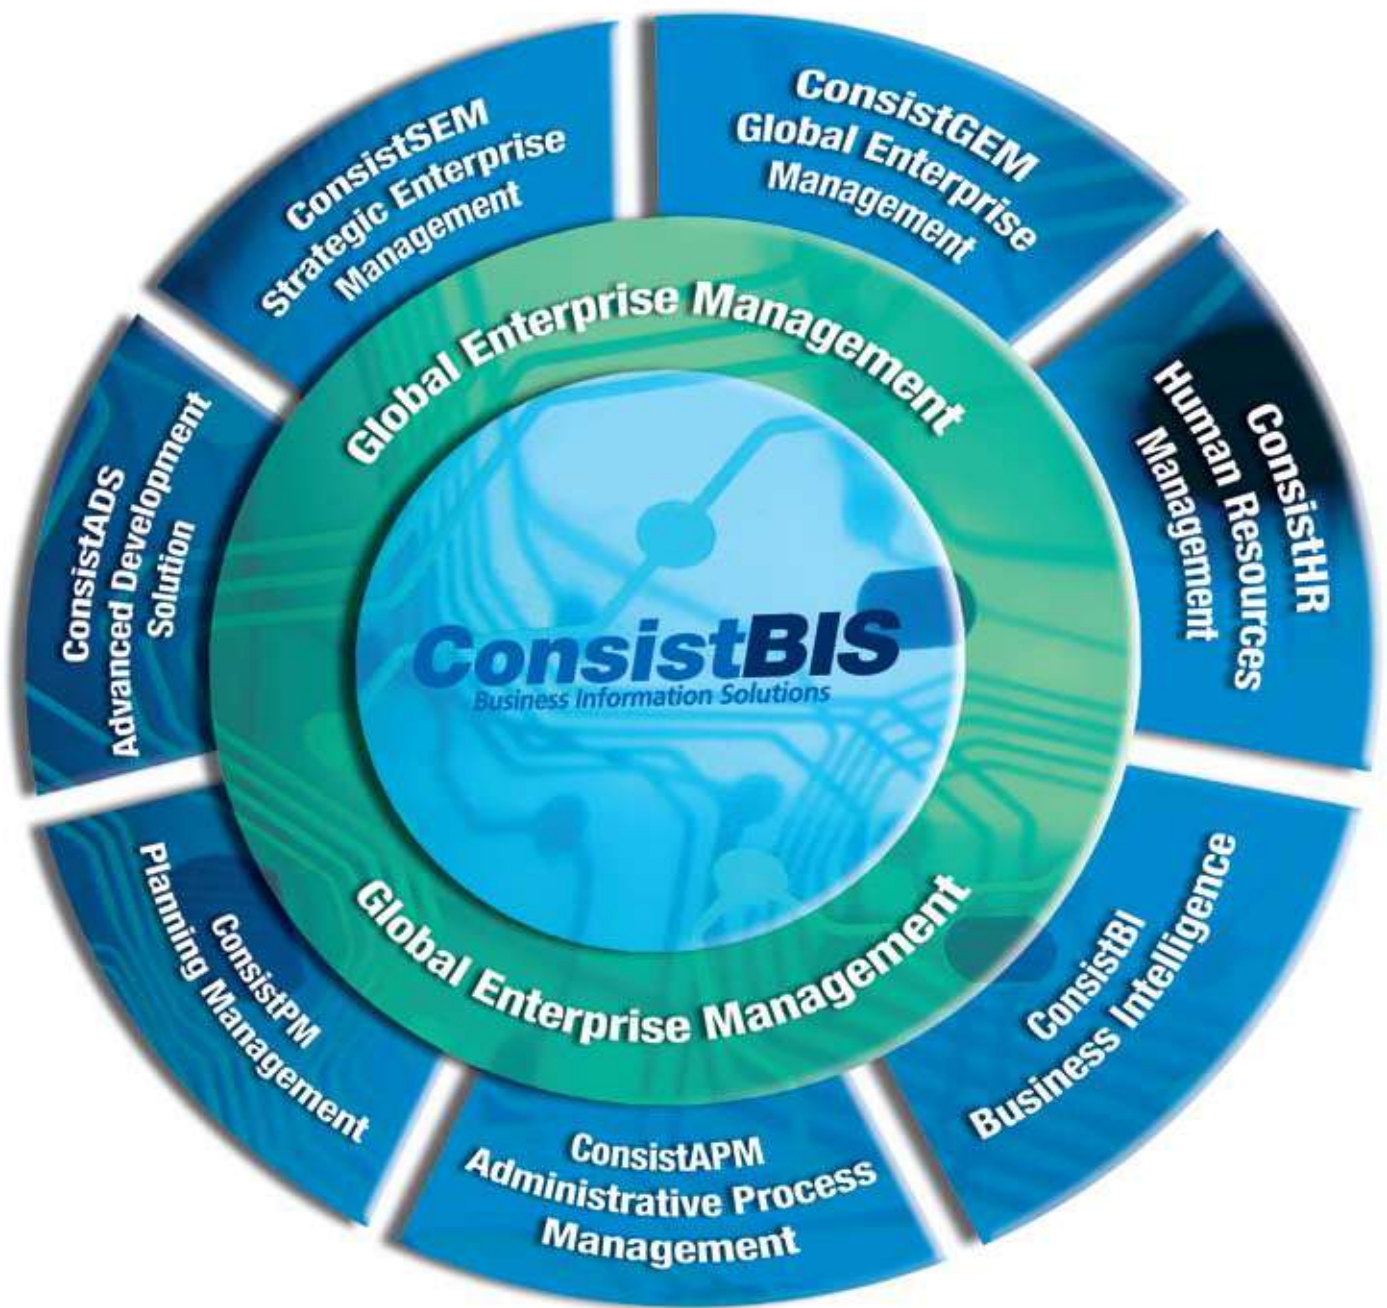

ConsistBIS is a solution that can be scaled to cater to varying workload and functional demands Its design is structured to protect the software investments of an organization.

ConsistBIS optimizes processes that support information and analytical needs, and is able to align and customize business solutions to market segments including:

- Financial Services
- Government
- Utilities
- Healthcare
- Industry
- Commercial
- Insurance

ConsistBIS modules are used according to the strategic, operational and collaborative needs of an organization to effect optimization and usage.. This ensures the support for customers, vendors and distributors and thus contributing directly to an increase in productivity.

A **Business Management** model that is modular, scalable and parameterized. One that aligns strategies and Key Performance Indicators (KPI) in order to manage **competitiveness, competence** and performance.

Modules ConsistBIS

ConsistSEM - Strategic Enterprise Management

ConsistSEM is a solution that focuses on the organizational alignment between strategy and performance. It provides managers with an integrated view of the performance, of an organization its financial indicators and other perspectives, such as: customers, internal processes, knowledge and development levels. ConsistSEM enables strategic management which produces information resulting in: target achievement, faster decision making, efficient communication and better resource allocations in addition to other benefits.

Consist Strategic Management solution - BSC (Balanced Scorecard) was the first Latin American software and the first Brazilian software certified by the Balanced Scorecard Collaborative – (BSCol) as a tool to implement the Balanced Scorecard Methodology. In addition to fully implementing the BSC methodology, CONSIST FlexSI supports several other strategic management concepts and corporate performance methods.

ConsistBI - Business Intelligence

The Business Intelligence tool helps to support better business decision-making in all areas of measurable relevance. This helps to achieve better financial and other measurable results. It consists of a suite of applications that enables strategic thinking by analyzing, comparing and simulating information using a management model. Profitability levels including costs and revenues are thus properly analyzed.

ConsistGEM – Global Enterprise Management

ConsistGEM is comprised of five modules: Economic, Financial, Supply, Fixed Assets and Taxation that provide service providers - such as banks, insurance companies, utilities and academic institutions, with a Global Enterprise Management Solution to effectuate strategy and rapid decision making.

ConsistGEM provides real-time information generated from the internal and supply chain related activities of an organization. In addition to operating simultaneously in several languages and providing a multi currency platform ConsistGEM architecture was created to process high volumes of data.

ConsistBIS increases the administrative efficiency of an organization and generates trustworthy decisions as it integrates all the organization through automated processes and up-to-date real-time information.

ConsistHR - Human Resources Management

ConsistHR is a solution designed to support all types of organizations irrespective of their size or type of activity. All categories of personnel whether by level, function, employment basis or additional parameterizable definitions can be supported.

With all functions available through the Web, the solution simultaneously supports several countries even with different employment laws and complex organization structures.

ConsistAPM – Administrative Process Management

ConsistAPM is a Business Process Management (BPM) solution used for modeling, automating and managing business processes. Designed to be integrated with existing applications, ConsistAPM is the ideal solution to achieve a rapid return on investment, greater visibility and control of the business, increasing efficiency, flexibility and quality.

ConsistAPM is designed to support the entire life cycle of processes and changes in business needs. ConsistAPM provides the user with the ability to conduct process modeling initially followed by the process monitoring, control, adaptation and optimization ensuring continuity of the process.

ConsistPM – Planning Management

ConsistPM is a complete solution that enables managing and implementing a more efficient process for planning, budgeting and forecasting. The organization is provided with the necessary agility to rapidly respond to changing market conditions. ConsistPM centralizes the financial targets and creates a platform for planning across the entire organization with real-time distribution, collaboration and forecasts.

ConsistADS - Advanced Development Solution

ConsistADS - Advanced Development Solution provides the user with all the necessary tools to take advantage of legacy applications written in NATURAL, by automatically converting the source codes to the ADVANCE language and making them available for compilation and execution. An integrated development environment that includes ADVANCE language, DB2® Database and the ConsistDMS component that converts the ADABAS Database to DB2®. Available in Intel, Risc and IBM Mainframe® z/OS®; Linux on System z®, UNIX, Linux and Windows platforms.
